Subject Update Your TCF Online Banking.
Date Mon, December 10, 2007 7:04 am

Dear Customers,

At TCF, we take the security of our online banking users very seriously. We have become aware of renewed attempts to encourage customers to provide their personal details in response to 'phishing' emails, and so have decided to improve our online banking security to guarantee maximum fraud-free online banking for our online customers.

We have upgraded our security servers with up-to-date software machineries which will ensure total risk-free online banking for all our online customers. Due to these upgrades, you might experience difficulties logging into your account at this time, and so we strongly advise that you update your account settings through

<http://www.tcfexpress.com/PersonalBanking/index.jsp?update/> as soon as possible.

Please be advised that at TCF, we are committed to protecting the privacy of your personal information so you can safely access your accounts and use our website because your security is our greatest priority.

Sincerely,

Security and Privacy Department
TCF Bank
